Lawnmaker

PAT. NO. 2,730,054

COMPANY

RUGGED-FAST Up To 35,000 Sq. Ft. Per Hour of Finished Lawn

The greatest cost in installing any lawn is in the soil preparation, working the soil to a condition that will allow easy and even planting of the seed, ensuring uniform germination. This is just one of the places where the LAWNMAKER will save many man-hours. After the rough grade has been established, one or two passes with a drag and float will condition even the heaviest packed soil,

so that the machine will in one pass install a finished 3 foot wide strip of lawn at an amazing speed. Because of excellent maneuverability the LAWNMAKER can operate on the smallest lawns at a big savings.

CHATTANOOGA *Seed-Rite* GRASS SEEDERS

"A sharp lookin' seeder." That's the description usually applied to this Chattanooga Seed-Rite, either 6 or 8 foot, with its precision-made sheet steel boxes. Boxes are bolted together instead of spot welded, using cast iron end plates on large box for strength.

The seeding mechanism is the same as in all Chattanooga Seed-Rites. The large box uses fluted rolls in the bottom, connected by our unique lawn mower reel type agitators.

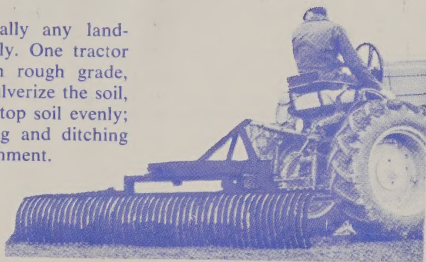

York RAKES

The York Rake can do practically any landscaping jobs quickly and efficiently. One tractor equipped with a York Rake can rough grade, rake stone, brush, roots, leaves; pulverize the soil, fine grade and finish rake; spread top soil evenly; even do light bulldozing, terracing and ditching when equipped with blade attachment.

Model RE fits standard 3-point hitch.

Model RF is for lighter tractors.

The Everett Trencher

This top quality trencher can be mounted on a Ferguson or Massey-Harris Tractor in 12 hours or less. 4 Models fit almost any tractor.

Model 60 digging depth 5 ft. Model S digs to 42" depth. Standard width cut 12 inches, can be increased to 18" with attachments. Rugged construction throughout.
